CTR	0.55% → 1.11%	+102%

Key Observation

Non-Optimized Pages: Higher traffic growth but **inconsistent CTR** post go-live. | **Agent Optimized Pages:** Consistently outperformed with **improved and stable CTRs**.

Result: Agentic Content stability balanced and sustained overall website CTR despite fluctuations. This pattern is consistent across customers—**clean, structured, agent-friendly content translates to better engagement and conversions.**

ANALYSIS SUMMARY

Conclusions & Recommendations

Key takeaways from the SonicLinker Agent Optimization implementation and strategic next steps.

KEY FINDING

CTR Improvement

Selected pages with Agentic Content achieved significant CTR lift, demonstrating enhanced AI agent understanding.

IMPACT METRIC

+20%

Selected Pages CTR Lift

GROWTH

Engagement Growth

Overall AI agent visits and recommended clicks increased substantially across the platform post-implementation.

VISITS GROWTH

+158%

Post-ADN Period

RECOMMENDATION

Expand Coverage

Consider enabling Agentic Content on additional high-traffic pages to maximize CTR improvements.

POTENTIAL IMPACT

Higher

Overall Platform CTR

Expand Agent Optimization

NEXT STEP 1

Expand agent optimization for Arabic pages. We will create more pages and make them live after approval.

Priority

expand current setup

Create More Content

NEXT STEP 2

Create more content around webpages that are already getting good traffic.

Ongoing

Content Development

Strategic Summary

SonicLinker Agent Optimization delivers measurable CTR improvements on optimized pages. Focus expansion on high-traffic segments and Arabic content to maximize platform-wide impact.
