STRATEGIC OPPORTUNITY

ROI Logic - AI-Driven Discovery Optimization

Incremental Qualified Human Traffic

AI recommendations drive additional qualified visitors beyond organic search

Expands reach through AI agent discovery

CPC Cost Substitution

AI-driven traffic reduces reliance on paid advertising channels

Lowers acquisition costs over time

Higher Conversion Efficiency

Better AI understanding leads to more relevant user journeys

Improves engagement and conversion rates

Brand Narrative & Message Control

AI-readable content ensures accurate brand communication

Maintains consistent brand voice

STRATEGIC FRAMEWORK

ROI Logic - ADN Opportunity

Current Challenges

Daily Fluctuation
CTR 0% - 3.33%

Category Gap
High visits, zero clicks

Low Conversion
Overall CTR 0.59%

ADN Solution Flow

Current State

Inconsistent interpretation
Variable recommendations

3,923 visits | **0.59% CTR**

ADN Intervention

Machine-readable structure
Add more context for AI agents without disturbing the human view/SEO

Expected Outcomes

Reduce fluctuation
Improve category performance
Increase CTR

Impact:

Stable Better Engagement

Strategic Positioning

ADN Role
AI optimization layer

Implementation
No UI changes required

Focus Area
Improve machine interpretation of existing content
